

## **W. Tecumseh Fitch**

Dept of Behavioral and Cognitive Biology, University of Vienna

Tecumseh Fitch is a cognitive biologist, and a professor and co-founder of the Department of Behavioral and Cognitive Biology at the Faculty of Life Sciences, University of Vienna. Fitch studies the biology and evolution of cognition and communication in vertebrates. He has a particular interest in the evolution of language, music and speech in humans, studied from a broad comparative perspective. Current research foci include bioacoustics, vocal learning, the biology and evolution of rhythm, empirical aesthetics and comparisons of syntactic abilities in different bird and mammal species. He holds a Bachelors in Biology and a PhD in Cognitive Science, both from Brown University. After a post-doc at MIT and Harvard, he lectured at Harvard and the University of St. Andrews before moving to Vienna in 2009. He is a recipient of an ERC Advanced Grant and is an elected Fellow of the Association for Psychological Science.
